

Civil Engineering Case Study

Sale West Phase 1 and 2 - Seddon Construction

Seddon

The team

Why choose Argyle?

Proven Expertise: Argyle has a history of successful delivery on residential and social housing developments, making us a trusted partner for large-scale groundwork projects.

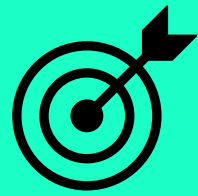

End-to-End Solutions: Argyle offers a complete suite of civil engineering services, from site clearance and drainage to external works, ensuring seamless project progression.

Client-Focused Delivery: Argyle works closely with clients to meet their programme requirements while maintaining the highest standards of quality and safety.

OUR Objectives

Seddon Construction approached Argyle to provide comprehensive groundworks for their social housing development. The works included site clearance, drainage and external works while ensuring smooth progress in line with the client's schedule and expectations.

OUR Challenges

Key challenges included resolving existing drainage problems that affected plot layouts and handling the logistical complexities in a high-density residential area.

OUR Solutions

We provided design advice for rerouting drainage and used a phased approach to maintain progress and manage site logistics. Our skilled workforce and effective scheduling ensured consistent quality and delivery within the programme.
