

# ARGYLE

CIVIL ENGINEERING / SURFACING / CONSTRUCTION

## The team

### Why choose Argyle?

**Proven Expertise:** Argyle is recognised for delivering high-quality surfacing solutions, helping major developers like Story Homes create exceptional residential environments.

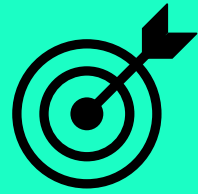

**Client-Centric Flexibility:** We work closely with site managers and engineers, offering tailored surfacing solutions that meet client requirements for quality and timelines.

**Commitment to Quality:** Our attention to detail ensures durable, long-lasting surfaces that enhance the functionality and aesthetic of residential developments.

## OUR Objectives

To provide high-quality surfacing works for private parking areas, driveways, and shared visitor car parks at Story Homes' Elston Park development. Our goal was to ensure the surfacing complemented the new homes and provided durability, while minimising disruption to residents.

## OUR Challenges

The primary challenge involved surfacing driveways and car parks of occupied homes, ensuring that we minimised disruption to homeowners. The team also focused on works withstanding the everyday pressures of development life, while servicing the local community long term.

## OUR Solutions

To overcome these challenges, we worked closely with homeowners and site managers, keeping them informed with clear communication, including letter drops. We used a premium asphalt containing a modified binder, designed for high durability and resistance. Through careful planning, we delivered the project on time, maintaining the high standards and reputation Argyle is known for.
